WHO WE ARE

Our Vision, Our Goal and our sights are firmly set on providing Eco-Friendly solutions to our end customer and also to the environment. We are indeed privileged and proud to be one of the organizations around the globe to provide eco-solutions for the betterment of our future and beyond. Please allow me to take this opportunity to introduce about our Company and we are honored/privileged to explain about us to you.

Having started the company in June, 2018 – Dynamic Green Energy Private Limited offers a combined PV package. Be it customized or turnkey solution, we plan from design and integration stage to the installation and commissioning of the system.

With a team of highly experience expertise we cater the needs for commercial, industrial, agricultural and residential sectors with our diverse range of fore-front products to set up and deliver an optimal solar power solution to you.

DYNAMIC GREEN ENERGY

OUR MISSION

GO GREEN
GREEN WILL THANK YOU

COMPANY BOARD

Mr. ARUN PANDIAN
Managing Director

A young techno commercial possess a deep understanding of the business stage at both national and international fronds. A passion listener and deep strategist being his core strengths while identifying the target road maps, Being an engineer, his analytical skills are sharp and exemplary. Mr. Arun Pandian, spares enough time in deeply understanding the key features of project alongside keeping an eye on the same. Also, as a head of the business family, stays updated on the new innovations and business inventions across the globe. A constant traveler, having small team of development closely and continuous working on the new business ideas.

Mr. VIGNESH MYLSAMY
GM - Projects

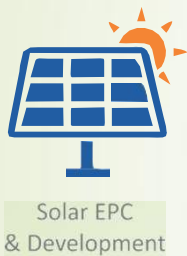

A Co-founding team member, being high – end technical command in the field pf solar which provides him and edge to command project execution team. His focus on time & quality delivery his expertise. The technocrat turned business – man spends enough time with team field. For engineering & design issue specially. His commercial skills unmatched when it comes to cost evaluation of the project & bidding. Not only his analytical skills but maintaining a rapport with customer & technical explanation in sync with business statistics is beyond comparison. His straight forward approached by clients is always welcomed one.

BUSINESS VERTICALS

We have successfully installed and commissioned up to 120+MW of Solar Power Plant Projects in and around Tamil Nadu till date, and have exceptional knowledge in the field for roof top & ground mount solar applications which contributes to almost 60% of business throughout India. Dynamic Green Energy has also successfully installed and commissioned Government projects within Tamil Nadu and has significant presence towards the Government Sector. Our Completed Projects Snapshots are provided below:

- 20 MW Ground Mount Solar Power Plant Installation and Commissioning at Kilakarai Ramanathapuram District
Client name: Annai Infra Developers Erode.
- 15 MW Ground Mount Solar Power Plant Installation and Commissioning at Andimadam Ariyalur District
Client name: Fesren Energy Private Limited Chennai.
- 3.5 MW Ground Mount Solar Power Plant Installation and Commissioning at Nelvai Chengulpattu District
Client name: S K Green Energy Coimbatore.
- 10 MW Ground Mount Solar Power Plant Installation and Commissioning at Kosavapatti Dindigul District
Client name: HYPKRT Energy Pvt, Erode.
- 16.8 MW Ground Mount Solar Power Plant Installation at Tuticorin.
Client name: Raha renewables pvt ltd.
- 8 MW Ground Mount Solar Power Plant Installation at Tirunelveli.
Client name: Pioneer Leather appears.

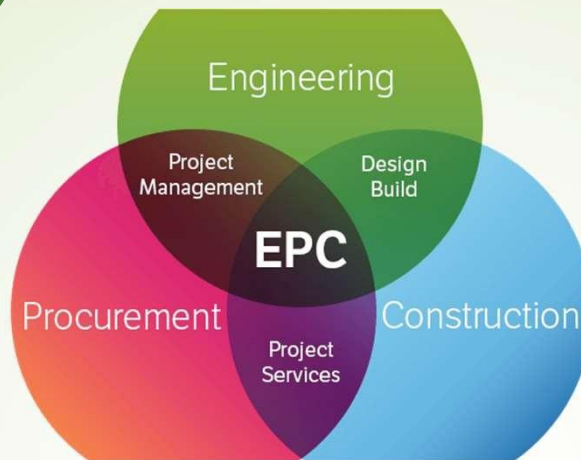

- 50 MW Ground Mount Solar Power Plant Installation at Ramanathapuram
Client name: Evarrenew energy pvt ltd.,
- 1 MW Roof Top Solar Power Plant Installation at Chennai.
Client name: Samsung india pvt ltd.,
- 2 MW Ground Mount Solar Power Plant Installation at Dindigul.
Client name: Talco dindigul
- 3.6 MW Roof Top Solar Power Plant Installation at Visapattnam.
Client name: Costal corporation limited.
- 7MW Ground Mount Solar Power Plant Installation at Ramanathapuram.
Client name: Olympia, Chennai.
- 5 MW Ground Mount Solar Power Plant Installation at Tuticorin.
Client name: Pioneer INC, Chennai.
- 5 MW Ground Mount Solar Power Plant Installation at Ramanathapuram.
Client name: Trio solar pvt ltd.,
- 600 KW Roof Top Solar Project Jindal Balleri –KA
Client Name: Tata Power Solar
- 500 KW Roof Top Solar Project GSK –KA
Client Name: Tata Power Solar
- 1.2 MW Roof Top Solar Project Sigma Pharma –KA
Client Name: Tata Power Solar
- 1.7 MW Roof Top Solar Project Le Shark Global –TN
Client Name: Mahendra Sustain
- 3 MW Roof Top Solar Project JK Tyers Chennai –TN
Client Name: First Green Consulting Pvt Ltd

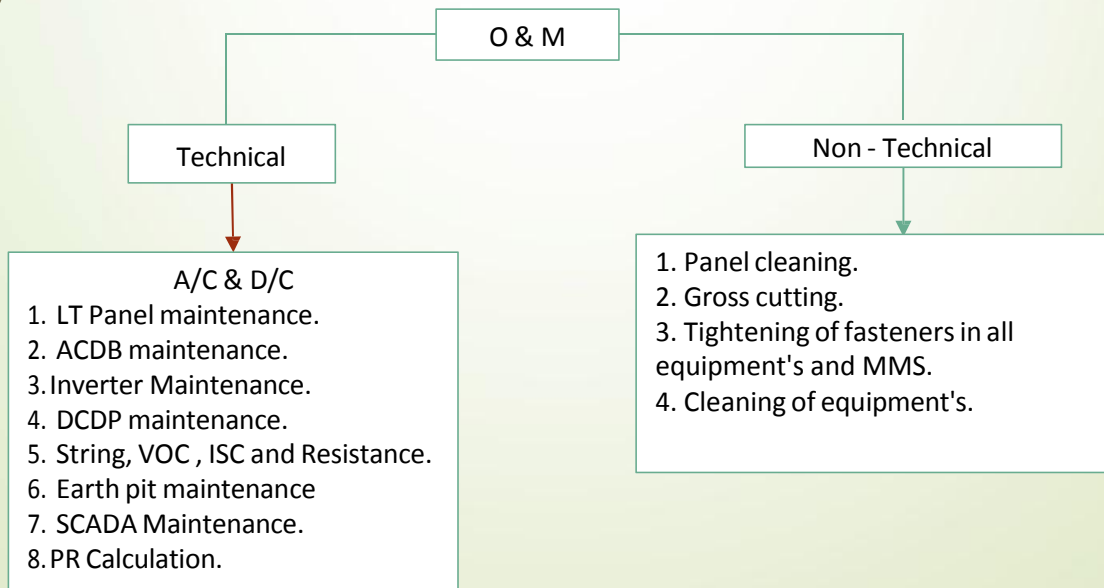

WHAT WE DO!

EPC DEVELOPER

O & M

MAN POWER DETAILS

- Survey team – 1
- Technician DC & AC – 20
- Piling team – 10
- MMS erection team – 20
- Civil Team – 20
- Helpers – 30
- Fabrication – 5

INSTALLATION AND COMMISSIONING

GROUND MOUNT

- Levelling
- Surveying
- Pile marking
- Auguring
- Vertical pole installation.
- MMS erection.
- Solar panel installation.
- Equipment erection
- Cable laying
- Earthing
- Testing and commissioning
- MCS erection
- SCADA installation
- Site handover

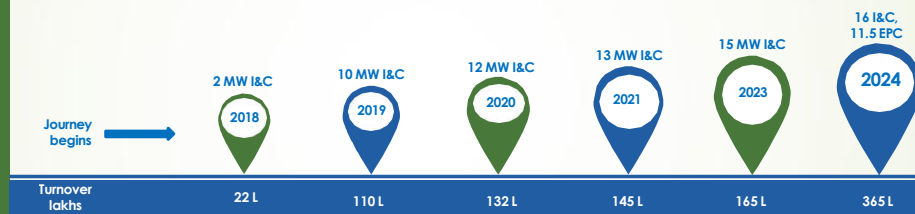

ROOF TOP

- Roof marking
- MMS erection
- Lifeline installation
- Walkway installation
- Handrail installation
- Ladder installation
- Cable tray installation
- Equipment stand fabrication
- Solar panel, Inverter ACDB installation
- Testing and commissioning
- Site Handover

HIGHLIGHTS

Milestones

TOOLS & TACKLES

AC & DC

- Multi meter- 2000V – 5 no's
- Clamp meter – 3 no's
- Insulation meter – 1 no
- IV curve measurement tool – 1 no
- PV200 Solar PV Tester.

Safety Tools

- PPE's – 100 set's
- Safety belt – 20 no's
- LOTO – 10 set's
- Welding goggles – 10 No's
- Earth discharge rod – 5 no's
- Sign and warning boards -5 set's
- HT & LT Gloves – 5 set's

GENERAL TOOLS

- Cutting M/C Heavy duty – 10 no's
- Hand cutting m/c heavy duty – 5 no's
- Hand drill m/c – 5 no's
- Nut runner cordless – 10 no's
- Cordless drill machine – 5 no's
- Hydraulic cable cutter – 1 no
- Crimping tools – 2 set's
- Multi spanner – 5 set's
- Welding m/c – 3 no's

TOOLS & TACKLES

SPECIAL TOOLS

- Torque wrench – 2 Nos
- Inclinator – 2 Nos
- 5KV megger – 2no's
- ERT Tester – 2 no's
- Radiance Tester – 1 no's

CIVIL TOOLS

- Template (100 to 200 mm) – 200 No's
- Gross cutter – 2 no's
- Earthing auguring – 2 no's

SITE VEHICLE

- Pile auguring m/c – 1no
- 1500 litres water tank tractor – 1 no
- Mini truck – 1 no

PLANT INAGUARATION

Inaugurated 16.8MW Solar power plants in
Raga renewables, Tuticorin (2024)

Inaugurated 7MW Solar power plants in
olympia, Ramanaduram(2021)

Inaugurated 50MW Solar power plants in
Everrenw Energy, Ramanadhapuram (2023)

PROJECT SUCCESSFULLY COMPLETED

Capacity	3 MW
Location	Muscat
Execution Time	70 Days

Capacity	500 KW
Location	Bangalore
Execution Time	60 Days

Capacity	1.7 MW
Location	Tirupur
Execution Time	120 Days

Capacity	16.8MW
Location	Tuticorin
Execution Time	120 Days

Capacity	10 MW
Location	Hyderabad
Execution Time	120 Days

Capacity	50 MW
Location	Ramanadhapuram
Execution Time	120 Days

Capacity	3 MW
Location	Chennai
Execution Time	70 Days

Capacity	8 MW
Location	Tirunalveli
Execution Time	120 Days

Capacity	3 MW
Location	Chennai
Execution Time	120 Days

TURNKEY SOLUTIONS - SUMMERY

Entire Plant setup is completed in 3 to 4 months (including land acquisition) or in 75 days (Post land acquisition)				
	Land acquisition	Design	Procurement	Construction and commissioning
Time lines	45 Days	15 Days	30 Days (1)	6 Days(1)
Challenges	Resistance from local authorities	Determination of optimal voltage connection levels	Approaching a few vendors might result in overpaying for items	Delays In the construction process due to delays in procurement and in obtaining permissions from the client
	Unsuitability of land plot for solar project construction.	Shadowing and seasonal tilt	Unreliable vendors lead to delays in time lines	
DGE - Advantages	Strong field acquisition experience and access to a network of intermediates across India Detailed site analysis prior to land acquisitions	Variations in soil quality and sloping of the land. Voltage determination done prior to component selection. Details irradiation analysis and use of manual / automated trackers Detailed soil analysis, design customization, flattering etc.,	Cheap sub-par products lead to reduced generation & increased plant design Run a through, competitive process to ensure optimal prices Focus is on quality and timelines of delivery	Continuous interaction between the design and procurement team and between the construction team and the client to ensure adherence to timelines.
A Wrong step can lead to a delay of 2 to 3 months and increase the cost by as much as 3 to 4 times				

ROOF TOP VERTICAL BUSINESS

We offer following three business models to our customers to fit their requirement and based on our assessment

CAPEX - BASED SOLUTION : End to end turnkey EPC service under a fixed price fixed time execution model.

OPEX - BASED SOLUTION: This is zero investment model for the customers wherein we setup the project on customer's roof with our own capital and supply power to the customer under a long term power purchase agreement.

CAPEX - FINANCING SOLUTION : Subject to credit metrics, we offer financing solution to customers wanting to set- up projects leading to only marginal investment by the customer as against entire capital cost.

ROOF TOP	VISION - 2023	PLAN - 2024
Aiming for market leadership position	100 MW capacity of rooftop projects across residential and institutional segment in 5 states of India Widely distributed portfolio with low unit risk and high returns	300+ MW capacity of rooftop projects across residential and instructional segment in 5 to 8 states.

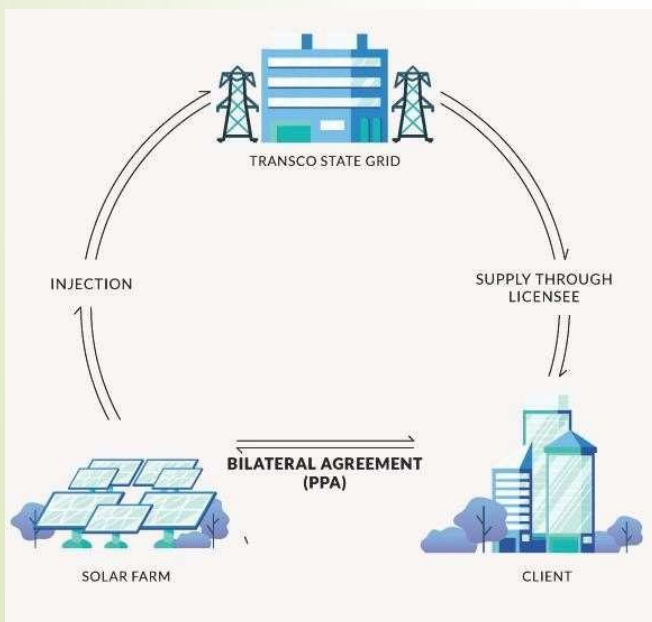

SOLAR OPEN ACCESS

Open Access model is for the industrial and commercial clients who want electricity directly from the generator at an optimum price. The customer pays for the electricity supplied to it directly from the generator under a long-term Power Purchase Agreement (PPA).

The Electricity Act, 2013 allows power consumers having the connected load of over 1 MW to buy power from sources other than the state distribution utility. We offer electricity to industrial and commercial users under long-term PPAs under Third Party, Group Captive or Captive open access model as per prevailing state regulations.

We are an experienced solar power developer in the field of open access. Our group companies have extensive experience and capabilities in the field of EPC for grid-connected utility-scale solar power projects. Our team of experienced professionals can manage the end to end implementation of solar power projects right from the conceptualization to execution and operations. We offer the most optimum and customized solutions to all our customers.
